

Remote Deposit Capture Policy Solution

GLADIATOR
TECHNOLOGY • A PROFITSTARS® SOLUTION

❏ **Does your institution have appropriate security controls in place to mitigate risks/threats specifically associated with RDC technology?**

❏ **Per FFIEC guidance, does your institution have written policies, procedures, and standards for managing Remote Deposit Capture?**

Gladiator's Remote Deposit Capture Policy is a new policy solution designed to incorporate standards of use of RDC technology.

Gladiator's strategy includes a practical approach to developing written standards and procedures to help manage the institution's RDC efforts drawing upon a combination of regulatory knowledge, best practices, and industry standards.

Through an **RDC Risk Assessment Matrix**, the program encourages a proactive approach to assessing risk for RDC technology in order to have adequate security controls and standards in place regarding this fast-growing technology.

Gladiator's Policies and Procedures provide documentation that addresses examiners' expectations for your unique organization. This service provides ongoing updates to your policy infrastructure as examiner expectations, industry standards, best practices, and security issues evolve.

Effectively implementing and managing a new technology such as RDC involves unique challenges, but you can rest assured with Gladiator by your side as your Technology Partner. Financial institutions nationwide trust Gladiator Technology for up-to-date information regarding the latest regulatory compliance guidance, best practices, and industry standards. We invite you to contact us to hear more about tailoring an RDC Policy to meet your institution's unique compliance needs.

Gladiator works exclusively with financial institutions, and is endorsed by leading national industry vendors, associations, and industry experts. Our staff of professionals will work with you to properly manage your technology, guard non-public confidential information, protect your reputation, and help prevent security breaches. And, you can rely on our comprehensive knowledge of FFIEC guidance to help you pass your next IT exam.
